

## **CONTRARIAN VENTURES**

Contrarian Ventures backs the boldest climate tech founders at the earliest stages - before it's obvious, before it's crowded.

We've never been just another VC. We act with speed, conviction and full-stack support - because solving climate takes more than capital.

We're building a full-stack climate platform to help our founders win - from our Energy Tech Summit to The Climate Brick and Climate50. We play long-term games with long-term people, driven by conviction, not consensus. You're not just building a company. You're reshaping industries. We're here for it - first check in, fully aligned, all in.
